

VILLAGE GREEN SEED

GREAT SEED . . . GREAT RESULTS

Features

Heat tolerance & Disease resistant

Fast establishment

Dark green/blue colour

High shoot density

Vigorous tillering

Benefits

Heat and drought tolerant

Dense sward

Strong summer performance

Seeding Rates

10-20gm per sqm

1-2kg per 100 sqm

100-200kg per ha

Distributed by:

ARROWHEAD

KENTUCKY BLUEGRASS

ATTRACTIVE ALL SEASON PERFORMANCE

Arrowhead is right on target when the need is for a reliable all season bluegrass with dark green color and earlier spring greenup. An aggressive variety, Arrowhead establishes a rich green compact turf that suppresses weed invasion and recovers quickly from injury and wear.

Arrowhead retains its density and vibrant color through the summer humidity and drought stress period with enhanced insect and disease resistance, particularly to dollar spot.

In NTEP trials Arrowhead has proven its versatility under moderate to high fertility, fairway mowing heights, and the conditions typical of the Transition zone.

Suggested for golf and sports turf, professional landscape, and turf production, Arrowhead is the ideal choice for turf managers and professional landscapers that require appearance and performance.
